

Pioche Weekly Record

THURSDAY, NOV. 30, 1893.

Arrival and Departure of Mails

PIOCHE AND MILFORD.
Arrives Sundays, Wednesdays and Fridays at 6:30 a. m.
Departs Sundays, Wednesdays and Fridays at 8 a. m.

PIOCHE AND ELY.
Arrives Tuesday and Saturday, at 6:45 p. m.
Departs Monday and Friday at 8:00 a. m.

PIOCHE AND HELM.
Arrives Tuesday and Saturday, at 6:00 p. m.
Departs Monday and Friday at 8:00 a. m.

PIOCHE AND HIKO.
Arrives Tuesday and Friday at 6:00 p. m.
Departs Saturday and Wednesday, at 10:00 a. m.

POSTOFFICE HOURS

8 A. M. TO 7 P. M.

SUNDAY

6 P. M. TO 7 P. M.

No money orders issued or letters registered after 6:30 p. m. and none on Sundays.

LOCAL INTELLIGENCE.

Attend the A. O. U. W. Ball to-night. Pay your taxes before Monday next.

This is the day on which to be thankful and eat turkey.

Pat Sheehan and Ernest Godbe went to Ferguson District Tuesday.

H. H. Cooper is up from Helena, business there being quiet.

The Post office drug store has a fine line of toys already displayed.

Good reports continue to come from various parts of Ferguson district.

Elmer Middleton is in from Lake Valley to take in the A. O. U. W. ball.

John Pippin disposed of a number of geese from the Colburn estate ranch on Monday.

W. J. Kennedy, agent for the Con. Imp. Co., at Milford, spent Sunday and Monday in town.

For dolls, and other things to please the little ones, go to the Post office drug store.

A portion of the stock of the Godbe Mercantile Co. was transferred to Bullionville during the week.

The Post office drug store is the place where you can select a nice present for the holidays. Do it now before the best are gone.

Supper for the ball goes to-night will be served at the Nevada Hotel Restaurant under the supervision of J. W. Palmer.

The County Commissioners hold a regular monthly meeting on Monday next. Present your bills before noon on that day.

Valley farmers overtook the town market with turkeys, anticipating a boom for Thanksgiving. It wasn't hard to do as cash is scarce.

Friday morning last opened with three inches of snow. Since then the weather has been unsettled, though for the past few days, extremely pleasant.

N. P. Dooley is removing his stock of dry goods, clothing and notions into the Odd Fellows' building on Main St. He requires more room than his present quarters afford, in which to display his newly purchased stock.

D. A. Reeves is improving slowly from an attack of lung disorder which has bothered him for a week past, and left this morning for a warmer climate.

The list of delinquent tax payers promises to be unusually large this year. County Treasurer Dooley reports receipts much further behind than usual. All taxes remaining unpaid on Monday next will have ten per cent delinquency added.

Mining Location Notices for sale at this office.

The Godbe Mercantile Co. is selling out at cost, and below cost in some instances, for cash. Now is your time to secure bargains.

Sunday last George Williams, at the Pioche Con. smelter was struck in the face with a large piece of ice, while clearing ice from the outside of the water tank. It was a knock out blow and has confined him to his room since.

The new law suspending assessment work for 1893 requires that all persons who desire to secure its benefits shall file notice with the Recorder before December 31, 1893. A form in compliance with the law has been prepared by THE RECORD and is now on sale at this office.

A. G. Campbell has concluded to remove his ten stamp mill at Milford, to Vanderhill district.

W. T. Rich leaves here to-morrow to undertake the work. It will be more than a chore to get this material across the desert, though this is as good a time of the year to do it in as any. The mill will be put up with plates instead of pans, and will be used for reducing gold ore.

Pierce McGuffee, aged about 19, met with a serious accident at the Helena Saw mill on Thursday of last week. He was working on the log carriage assisting to free the saw, which was binding, when he slipped and came in contact with the saw. The thumb and second finger of the left hand were amputated, and the index finger of the right hand badly lacerated. The boy was brought in and placed under care of Dr. Campbell and is getting along fairly well.

Both departments of the public school adjourned yesterday until Monday morning.

For bargains in boots, shoes, hats, caps, clothing, etc., go to the Mercantile Co.'s store before it becomes too late.

Toilet articles, toys, books and many other kinds of holiday goods are displayed at the Post office drug store.

A fine line of underwear at cash prices which will surprise you, at the Mercantile Co.'s store.

Never believe all you may hear; for he who believes all that he hears often believes more than he hears.—Arabian Proverb.

Hall's Hair Renewer cures dandruff and scalp affections; also all cases of baldness where the glands which feed the roots of the hair are not closed up.

JOB PRINTING in all its branches, equal in style to any, done at this office.

Notices under which to take advantage of the law passing assessment work on mining claims for this year, for sale at this office.

We have received a number of the Student Record, issued semi-monthly by the students of the State University at Reno. It is a model of typography, ably edited and has THE RECORD's best wishes for success.

It is strange that some people will suffer for years from rheumatism rather than try such an approved standard remedy as Ayer's Sarsaparilla; and that, too, in spite of the assurance that it has cured so many others who were similarly afflicted. Give it a trial.

T. E. Edwards on Saturday last, secured a ninety days option on the Gold Eagle and Zip Coon properties in Ferguson district on an amount reported at \$10,000. These two promising claims lie southeast of the April Foot properties and about half a mile distant from them, on Tin Horn Mountain. A very little work is expected to show up big results there.

The Nevada Agricultural Experiment Station will send gratis, to all persons desiring to exhibit fruit and small vegetables at the Midwinter Fair, instructions by which the original shape, color and freshness of the fruit will be permanently preserved. Address N. E. Wilson, Chemist, Experiment Station, Reno, Nevada.

International Irrigation Congress.

The Official Proceedings of the International Irrigation Congress, held at Los Angeles, California, October 10th to 14th, have just been issued in pamphlet form. The book contains nearly two hundred pages and embraces the Call for the Congress; the Addresses of Welcome; a List of Delegates; Permanent Organization; Address of the President; Formal Opening address; Resolutions Introduced by Members; Addresses Delivered, (a) by Foreign Delegates, (b) by American Delegates; Principal Discussions; Address to the Country; National Executive Committee; Organization of the Committee and the Plan of Work for the next Congress.

The discussions cover a wide range of topics on irrigation subjects and the book contains material of deep interest to all the citizens of the arid States. The proceedings are published by the Los Angeles Chamber of Commerce and extra copies can be secured by sending six 5-cent stamps, to cover cost of printing and postage, to Fred L. Allen, Secretary International Irrigation Congress, Los Angeles, California.

At Comet District.

This section, practically abandoned for years, till recently, now promises to become one of the chief ore producers of this vicinity, and that too, very shortly.

Recent prospecting work there has developed a body of ore, carbonate and chlorite, exceedingly rich, and the extent of which can now only be conjectured.

This new development is situated about two miles south of the old workings of the district, which were mostly made some ten years ago, and differs from them, in that the ledge runs north and south, with the formation, while in the former prospecting there, ledges running east and west were sought.

This new find, owned by Ed. F. Freudenthal and Owen Smith is a contact vein, with lime on the foot and slate in the hanging. It was found last spring, and located as the Lyndon. There are no croppings. A limestone cap, of from two to three feet in thickness, covers the ore deposit which, in the Lyndon has been out in several places, every out indicating the presence of a very large ore chamber. The main working now, is a twenty-five foot incline shaft, all in pay ore, some of it running as high as 700 oz. to the ton. Three hundred feet north of this a new shaft has just been started, and here, of the same character as that in the first shaft, and running 400 oz. to the ton has been encountered immediately below the limestone cap. About 200 tons of ore lie on the dumps, taken out in the development work which has been done. The owners are anxiously awaiting the completion of the Ballionville, Condon or Hiko mills, and expect to begin realizing immediately thereafter. A car load of the richest ore was out and ready for shipment when the drop in silver occurred last July, and the ore being mostly chloride, then commanded a poor price, that the owners determined to hold it.

For sick headache, caused by a disordered stomach, Ayer's Cathartic Pills are the most reliable remedy. "My mother first recommended these Pills to me, thirty years ago. They are the mildest the best purgative in use."—S. C. Bradburn, Worthington, Mass.

A \$400,000 Deal.

On Saturday last, Samuel T. Godbe secured options on the Monitor and Jim Crow properties at Ferguson district, on ninety days time, and the consideration involved in the transactions is reported to be \$450,000. D. A. Reeves, A. C. Ellis and Frank Wilson part with the Monitor, Monitor Camp, west half of the Cliff, the Princess, seven-eighths of the Lucky Bar and three-fourths of the Millionaire claims, on a basis of \$300,000 it is said. This still leaves them the April Fool and several other claims lying immediately north of it, of great value in themselves. Messrs. Neabitt Bros. and Mrs. J. McFadden list seven-eighths of the Jim Crow claim on a reported basis of \$150,000.

These properties are regarded now as the cream of Ferguson district and their transfer into the hands of some company willing to work them will bring Ferguson out as one of the first gold camps of the coast.

The Monitor Dump and the Jim Crow are each working on the same rich ore body, their workings being but a short distance apart on the surface. The short line of the claims is said to pass directly through the ore deposit. The vein is a fissure in quartzite and porphyry. The strike is about north and south and the dip is something like one foot in five. Heavy croppings, almost a reef, appear above the tunnel, forty feet wide, six or seven feet of these croppings are rich enough in gold to ship to Salt Lake, while the remainder will average \$30 a ton. The main working is a tunnel, in now about 530 feet. It was commenced to develop a claim farther up the hill. At eighty feet a 50-foot belt of porphyry was cut through, immediately beyond which ore was found and with this exception, the whole length of the tunnel is on the ledge. At about 175 feet in, the ledge is cross-cutted for twenty-eight feet all ore, which will average \$40 to the ton. In this is a streak of about six feet wide which runs on an average five and a half ounces gold to the ton. It is from this streak principally that the 275 tons shipped to Salt Lake since last Spring has been taken. The excavation serves to show up the property all the more. This streak is about 75 feet long and no ore has been taken out of it either above or below the tunnel level. It pitches westward into the Jim Crow ground.

The Jim Crow workings, while not as extensive as those of the Monitor, show up nearly as well. At the edge of the east line a shaft has been sunk 143 feet, all in low grade ore. This was the first work done. The present working tunnel was then commenced some distance down the hill from that of the Monitor. It is now 290 ft. with ore, without walls, for the last 160 feet. At 240 feet from the entrance a cross-cut east, of 19 feet, is all in ore averaging \$12 to the ton; another of 20 feet to the west is in ore of about the same grade. At this point also a fifty foot wize was sunk, in ore averaging \$40 a ton. In the bottom of this wize a rich streak from which assays of 15 ounces to the ton in gold, have been obtained, is being worked now. From this wize a drift of 50 feet has been run to the north and car samples, taken for the last three weeks show it to average nearly \$50 to the ton and steadily improving. At the shaft dump some 400 tons of second grade ore are out, while at the tunnel, from 1800 to 2000 tons of \$40 to \$50 ore is stacked, ready for shipment. Not a pound of this has been shipped, but it is the result of ordinary development work.

Mr. Godbe has successfully handled several heavy properties heretofore. His chances of success with the present options are regarded as very promising. There is no doubting their merit. He expects to return here on the same business in about a month.

Yellow Pine's Lead Deposits.

The lead mines of Yellow Pine District have been spoken of a great deal since the construction of the Nevada Southern Railway began and it is to them that the Railway looks largely for its freight. Two car loads of lead ore recently shipped from the Galeana, south of Good Springs, owned by the Montgomery Brothers, to the Philadelphia Smelting and Refining Company, at Pueblo, Colorado, ran as follows: First car, 67 per cent, lead, 15 oz. silver; working charge 76 c, price paid per ton, \$41.04. The second car, 63 per cent, lead, 21-3-10 oz. silver; working charges, 98 c; price paid per ton, \$42.79. Still better prices can now be realized for lead than the prices paid for these cars. As there are at least 60 or 70 lead mines in the Yellow Pine Mining District which can produce from ten to twenty tons per day of as good ore as this, the faith of the railroad promoters is in a measure accounted for. One of the biggest mining centers of the country will be found in that vicinity before two years more shall have passed.

The Godbe Mercantile Co. continues to sell at very low prices for cash. Some excellent bargains have been obtained there during the past week.

The Panos folks have provided to-day for a good evening's amusement. The Young Ladies' and Young Men's Mutual Improvement organizations have gotten up an excellent programme, which will be rendered in the school house.

Several women, it is said, have taken to tramping their way from the North into California. Three got aboard a freight car at Ashland, Or., and when over the train stopped got off and solicited food. At one place, it is reported a tramp insulted one of the women when the three sailed in together and gave him a trouncing that he will remember for many and many a day.

Tariff Legislation.

Silver and Lead Ores on the Free List.

Miners Have Something to Think Over.

Harmless Cannonading at Rio Janerio.

DOINGS IN SALT LAKE CITY.

Special Dispatches to THE RECORD.

NEW YORK, Nov. 30.—Silver, 69; Copper, \$9.70; Lead, \$3.30.

SALT LAKE, Nov. 28.—The City Railway Company yesterday won the twenty thousand dollar damage suit against it by Mrs. Edwards.

The fame of Camp Floyd gold district, fifty miles south of this city, has reached Colorado, and several sales are being negotiated.

A dispatch from Montana says the Montana sheep men are up in arms over the proposal of free wool.

A dispatch from Bingham last evening states that an extraordinarily rich strike of ore has been made in the Stewart No. 1 mine at that camp. The ore goes on an average of one hundred and fifty thousand dollars to the ton.

Frank J. Cannon has tendered his resignation as editor of the Ogden Standard. The reason is supposed to be in the inability of himself and Mr. Greenman to agree. The latter is manager of the paper.

A special from El Paso, Texas, yesterday says: "A courier arrived this evening with an account of a skirmish which occurred between Mormon colonists and rebels last Wednesday. A party of seven colonists, who had been reconnoitering, were ambushed by over forty revolutionists. The colonists made a stand, and killed one of the rebels and wounded several others. The colonists then retreated to a canyon near by, and kept the rebels off until night, when they were rescued by a party of citizens and soldiers sent out by Colonel Dublin. All the colonists escaped injury. The failure of the Government to afford the colonists protection resulted in the colonists arming themselves and standing guard day and night.

A special from Washington last evening gives the provisions of the new Democratic tariff bill. They fulfill every expectation of those who predicted the bill would be a measure of radical reform. In many respects it is a surprise, even to the Democrats, as it is unprecedented in many provisions. The free list is of liberal scope, sufficient to satisfy the most radical advocates of reform, and the repudiation of the principle of reciprocity is decisive and emphatic.

This bill, in addition to the tariff reforms, will, if passed, necessitate a readjustment of the treaties with the South American countries which enjoy a practical or theoretical reciprocity with the United States. The bounty on sugar, instead of being repealed at once, will not be repealed till after the close of the present century. The following is the free list: Beginning March 1st the following articles will be added: Bacon, hams, beef, mutton, pork, meats of all kinds prepared or preserved, not otherwise provided for. Binding twine, made in whole or in part of thistle or tannin; fibre; manilla, stuffed birds, not suitable for millinery, blue vitriol, bone, charcoal, bituminous coal, coke, coal tar, oxide of cobalt, copper ores, chippings from new copper, all compositions of which copper is the chief component of value, regular and black copper and copper cement, copper plates, bars, ingots, etc., diamond dust or cut jewels used in the manufacture of watches and clocks, yolks of eggs, birds, fish and insects, fresh fish, undressed furs, iodine, iron ore, including magniferous iron ores or burnt pyrites, sulphur or pyrites in natural state, lead, lemon juice, mica and crude metallic minerals and unwrought metal, ochre and ochre earth, silena and sienna earths, amber and amber earths, cotton oil, paintings and statuary, plows, tools, disc harrows, harvesters, reapers, drills, mowers, hoes, rakes, cultivators, threshing machines, cotton gins, plow black for making men's hats, quicksilver, salt, silk not further advanced in manufacture than carding or combing, sulphate of soda or salt cake or nitre cake, tallow, wool, grease, straw, burr stones bound into mill stones, freestones, sandstones, limestone and other building or monumental stone except marble undressed, all wearing apparel and other personal effects on identity being established by the Treasury, timber hewn and sawed, spar and wharf timber squared or sided, planks and other lumber, shingles, staves, manufactured goods, provided the same duties as now exist shall obtain in all cases in which an export duty is laid on any article in the above schedule; chair cane or reeds, cedar, lignum vitae, lance wood, ebony,

box, mahogany, rosewood, satinwood, all forms of cabinet woods in logs, rough or hewn, manufactured briar root or briar wood, palmetto, orange, myrtle and other woods in rough. All wool of sheep, hair or camel, goat, alpaca and other like animals, wool and hair on the skin, yarn, waste and burr waste, rough and plain, including all waste or rags composed wholly or in part of wool.

The Knights of Labor accepted General Master Workman Powderly's resignation yesterday, and elected James R. Soverign, of Iowa, to succeed him.

NEW YORK, Nov. 28.—A high Republican organ in this city, commenting on the recent freaks of nature, says: "There is distress on every land on the earth." It almost gives significance to a statement made by a devout lady the other day on the street when she said: "I believe the last days have come; there is distress of nations; men's hearts failing them with fear and the sea roaring," and she might have added, "Mr. Cleveland is President and if the devil was ever to be let loose for a thousand years, it looks as though he had begun his work."

A special cablegram from the Continent brings the startling news that another earthquake in Persia killed twelve thousand people the latter part of this week. The death list, which is being constantly augmented, is terrible. News is also received of another mighty storm which has just wrecked the British coast. Ships coming into English ports are all storm battered and a great many that are expected do not come.

A dispatch from Berlin yesterday says that an unsuccessful attempt was made yesterday to blow up the Chancellor of the Empire, Von Caprivi.

SALT LAKE, Nov. 29.—The World's Fair Commissioners awarded to Utah the first medal for having the best display of minerals in the Mining building.

At Ogden yesterday the Pioneer Electric Power Co., was incorporated with a capital of one million dollars. Prominent Mormon church leaders head the movement. It is proposed to use the waters of Ogden river, which is estimated to be about ten thousand horse-power.

A special from Logan, Utah, last evening, says that George W. Thatcher, Mayor elected, made a most brutal and cowardly assault upon the editor of the Nation, without any cause or provocation. Thatcher was immediately placed under arrest and pleaded not guilty.

PHILADELPHIA, Nov. 29.—Since the assembly of the Knights of Labor adjourned here yesterday, such dissatisfaction has been expressed concerning the way the Assembly conducted its business this year, that many believe the Order will not live through another year.

NEW YORK, Nov. 29.—A cablegram states that an infernal machine was sent to the Emperor William of Germany, yesterday, by a Frenchman.

A special from Rio Janeiro, dated Nov. 21, which is the latest, states that the streets are crowded with pedestrians and business is paralyzed. The damage to those buildings which have been hit during the bombardment, is apparent. Most of those who were killed were along the water front, where Admiral Mello's launches patrol day and night, exchanging shots with Piexoto's ironclads. The Government forces have been pounding shot and shell into Fort Villaigaignon daily for the last week. The barricades are now almost in ruins, while the fort itself is in fairly good condition. The garrison in the fort is still united in its adherence to Mello's cause. Mello's fleet repulses the attack from the shore, with their heavy guns. The garrison is supplied with food by launches which are constantly patrolling the harbor. Many of the shore batteries have been put out of action by the guns from Fort Villaigaignon. The residents of the city regard the constant firing with indifference. Crowds collect at points of vantage on the front to witness the firing. Mello is at present deterred from landing owing to the small force on his ship.

The government has suppressed a church newspaper because of unfavorable criticisms of the government organ. Piexoto has thus incurred the dislike of the Catholic clergy, many of whom are secretly in favor of a restoration of the monarchy, because they were deprived of their salaries under the Republic.

WASHINGTON, D. C. Nov. 28. The Brazilian Minister, Mendonca, is sanguine of the early annihilation of the Insurgent fleet. He said last night that he did not believe any use would be found for the ships purchased in this country after they arrived, except as an adjunct to the future navy of the Brazilian Government. He firmly believed that Admiral Mello is drawing his last breath and is confident that Mello's supply of ammunition and provisions are getting dangerously scarce, and that within less than a fortnight the end of the revolution will have been reached. From the fact the vessels of Mello's fleet are showing much more freedom than formerly, the minister concludes they must be getting empty in their coal bunkers as well as in their magazines, which leaves Admiral Mello in a most embarrassing position.

ST. LOUIS, Nov. 29.—A railroad with one terminal at the Gulf of Mexico, another on Lake Michigan and a third on the Pacific Coast, would make a system more complete and effective than the world has yet seen. This may be possible sometime according to a dispatch from Freeport, Ill., last night which states that it is probable that the Illinois Central will be the company to own such a line. It already has a line from Chicago to New Orleans and one from Chicago into Iowa.

EL PASO, Nov. 29.—An address to the Mexican soldiers has been distributed in Juarez; the address closes as follows: "Mexican soldiers, if you wish to avoid bloodshed, join the revolutionists, and seek the salvation of the country. You defend a man who makes you slaves and you seek his aggrandizement. Down with the tyrant. Hurrah for the revolution! Hurrah for Tomachi."

SALT LAKE, Nov. 30.—Cass Hite, the well-known Utah and Colorado pioneer, who was found guilty at Provo, on Oct. 13th, 1892, of murder in the second degree for the killing of Adolph Kohler, at Green River Utah, on Sept. 9th, 1891, and sentenced to twelve years in the penitentiary, was pardoned yesterday by Governor West. Hite was tried twice on the charge but on the first trial the jury disagreed.

Charles Young, sentenced to seven years in the reform school was also pardoned at the same time.

The condition of Clarence W. Hall, who has been sick with typhoid fever for some weeks, is critical in the extreme, and the worst is feared.

Two hold-ups were reported last night. Nothing was secured however in either case.

A strong incorporation was formed yesterday to utilize the power of Big Cottonwood for lighting, heating and cooking, power for all kinds of machinery and all kinds of manufacturing. The incorporators include such men as J. W. Donnellan, W. H. Rowe, Thos. Marshall, Geo. W. Scannell, J. W. Sinner and G. M. Downing.

A special telegram from Washington last evening says: "The silver and lead miners will find in the new tariff something to think over besides the clause placing silver and lead ore on the free list, in the proposition to make bonded warehouses of all smelters. It is claimed that this will afford an opportunity for fraud if the smelters should desire to engage in it and that it would still further increase the importation of mixed ores. The metal schedule provides for a duty of 15 per cent. ad valorem on lead ore, and for no duty on ore containing both silver and lead in which the silver is of greater value than the lead. It will be left to the Treasury Department to fix the regulation under which the ore shall be admitted and if the Department officials should be friendly to the smelters, it is argued, it would be a very easy matter to admit almost all lead ore under the silver-lead classification. There is a prospect that the bonded warehouse proposition will be strongly antagonized.

NEW YORK, Nov. 30.—The latest from Rio Janerio is to the effect that Admiral Mello has gone out to meet the war vessels now on the way from the port of New York.

County Recorder Turner and District Attorney Culverwell returned from their trip to the Muddy gold excitement on Sunday. They went below the Muddy as far as the Vegas ranch. They report no boom but are more hopeful of discoveries than some others who were carried away by excitement two weeks ago. The country thereabouts contains many ledges, most of which will assay in a small way and they believe that when railroad facilities enables prospecting to be carried on there more easily, that rich mines will be found. The ground now being prospected is that between the Muddy Valley and the Vegas, where one particularly large ledge has for some time past attracted attention and from which one or two very high assays have been obtained. To locate some portion of it, which it will pay to at once develop is the effort of the few prospectors now in the vicinity.
